

NEW CUTTING EDGE DAIRY TECHNOLOGY

PRODUCT OVERVIEW

The new Protect+ from Charm Sciences is a revolutionary way of testing for antibiotic residues in milk. The new systems allow for multiple tests to be conducted at the same time, speeding up intake and processes. The Charm antibiotic test strips are world-leading regardless of the reader - saving you money & providing peace of mind.

CHARM CONNECT

- Program emails to be generated automatically whenever a POSITIVE sample occurs.
- Notify groups of people based on the distribution setup
- Cloud & Data Integration for live data and results

KEY POINTS

Key Points:

- Live data straight to the cloud
- Can read the full range of charm antibiotic ROSA test strips
- Proven world-standard brand for antibiotic testing
- Scalable to allow 6 independent tests to be run at one time

TEST

Run up to six samples at once with patented Incubate and Read in one step.

TRUST

Rugged, smart optics verify proper milk flow, identify errors, and reduce cleaning.

PROTECT

Email alerts, automated reports, and real-time integration with your systems.
